Munazza Begam

Software and Hardware Engineer

I am a second-year engineering student specializing in Electronics and Communications with a passion for technology and innovation. With a keen interest in both hardware and software, I have developed a strong skill set in working with development boards and web development.

Education Qualification

○ **Undergraduate**
PA College of Engineering, Kairangal
2021-2025

○ **12th std**
St. Philomena PU College
2019-2020

○ **SSLC**
Vittal Jaycees English Medium School, Vittal
2019

Projects

○ **Hand Sanitizer Dispenser Automation Project**
Designed and prototyped a cost-effective, hands-free hand sanitizer dispenser using Arduino-based microcontrollers.

○ **Engineering Student Notes Website**
Created a user-friendly and responsive website using modern web development technologies.

○ **Development Boards and Kits Information Website**
Developed an informative website dedicated to providing in-depth details and resources about development boards and kits commonly used in electronics and programming projects

Certification

○ **API Postman Student Expert badge**
Achieved Postman Student Expert Badge, demonstrating proficiency in API testing and collaboration using Postman.

○ **Certificate of Completion**
Completed Full Stack Web Development Bootcamp by Dexterity, covering HTML, Node.js, and Laravel."

Achievements

● **Web Development Competition**
Achieved 2nd prize for creating a website, showcasing my ability to design and develop engaging online platforms.

● **National-Level Hackathon Winner**
Competed against 40+ teams, showcasing exceptional technical skills and innovation.
